

INTRODUCING FIREFOX OS

Sayak Sarkar (@sayak_sarkar)
<http://sayak.in>

What is Firefox OS?

Firefox OS is an open platform for mobile Devices, built entirely using HTML5 and other open Web standards which is free from the rules and restrictions of existing proprietary platforms.

WHY USE HTML5?

In-built distribution - the web

Simple technologies used by lots of developers

Evolution of existing practices

Open, independent, standardized

PROMISES OF HTML5

mozilla
Firefox®

How Real is it?

Released in four countries: Spain, Poland, Venezuela and Columbia (more to come very soon)

18 mobile operator partners, 6 hardware partners

Hardware options: Alcatel One Touch Fire, ZTE Open, Geeksphone Keon, Geeksphone Peak...

Aimed at emerging markets/low end market

Aimed to be an alternative to feature phones and unavailable closed environments.

Open source - it is all on GitHub

"Movistar offers the ZTE Open for €69, including €30 of balance for prepaid customers and a 4GB microSD card"

ARCHITECTURE

Third Party HTML5 Apps

GAIA

Web APIs / Web Activities

Gecko rendering engine

Linux/Gonk (ADB enabled)

App permissions

HISTORYEDIT

The `permissions` field in the [app manifest](#) controls the app's access to various sensitive APIs on the device (Web APIs). The permissions are described in the following tables.

Privileged apps have all the permissions of hosted apps plus more. Certified apps have all the permissions of privileged and hosted apps plus more. For more information on app types, see [Types of packaged apps](#).

TABLE OF CONTENTS

[Hosted app and privileged app permissions](#)

[Certified app permissions](#)

BATTERY STATUS API

BATTERY STATUS API

```
var battery = navigator.battery;
if (battery) {
    var batteryLevel = Math.round(battery.level * 100) + "%",
        charging = (battery.charging)? "" : "not ",
        chargingTime = parseInt(battery.chargingTime / 60, 10),
        dischargingTime = parseInt(battery.dischargingTime / 60, 10);

    // Set events
    battery.addEventListener("levelchange", setStatus, false);
    battery.addEventListener("chargingchange", setStatus, false);
    battery.addEventListener("chargingtimechange", setStatus, false);
    battery.addEventListener("dischargingtimechange", setStatus, false);
}
```

SCREEN ORIENTATION API

SCREEN ORIENTATION API

```
// Portrait mode:  
screen.mozLockOrientation("portrait");  
  
/*  
Possible values:  
    "landscape"  
    "portrait"  
    "landscape-primary"  
    "landscape-secondary"  
    "portrait-primary"  
    "portrait-secondary"  
*/
```

VIBRATION API

VIBRATION API

```
// Vibrate for one second
navigator.vibrate(1000);

// Vibration pattern [vibrationTime, pause,...]
navigator.vibrate([200, 100, 200, 100]);

// Vibrate for 5 seconds
navigator.vibrate(5000);

// Turn off vibration
navigator.vibrate(0);
```

NETWORK INFORMATION API

NETWORK INFORMATION API

```
var connection = window.navigator.mozConnection,  
    online = connection.bandwidth > 0,  
    metered = connection.metered;
```

AMBIENT LIGHT EVENTS

AMBIENT LIGHT EVENTS

```
window.addEventListener("devicelight", function (event) {  
    // The level of the ambient light in lux  
    // The lux values for "dim" typically begin below 50,  
    // and the values for "bright" begin above 10000  
    console.log(event.value);  
});
```

PAGE VISIBILITY

PAGE VISIBILITY

```
document.addEventListener("visibilitychange", function () {  
    if (document.hidden) {  
        console.log("App is hidden");  
    }  
    else {  
        console.log("App has focus");  
    }  
});

WEB ACTIVITIES

GET A PHOTO?

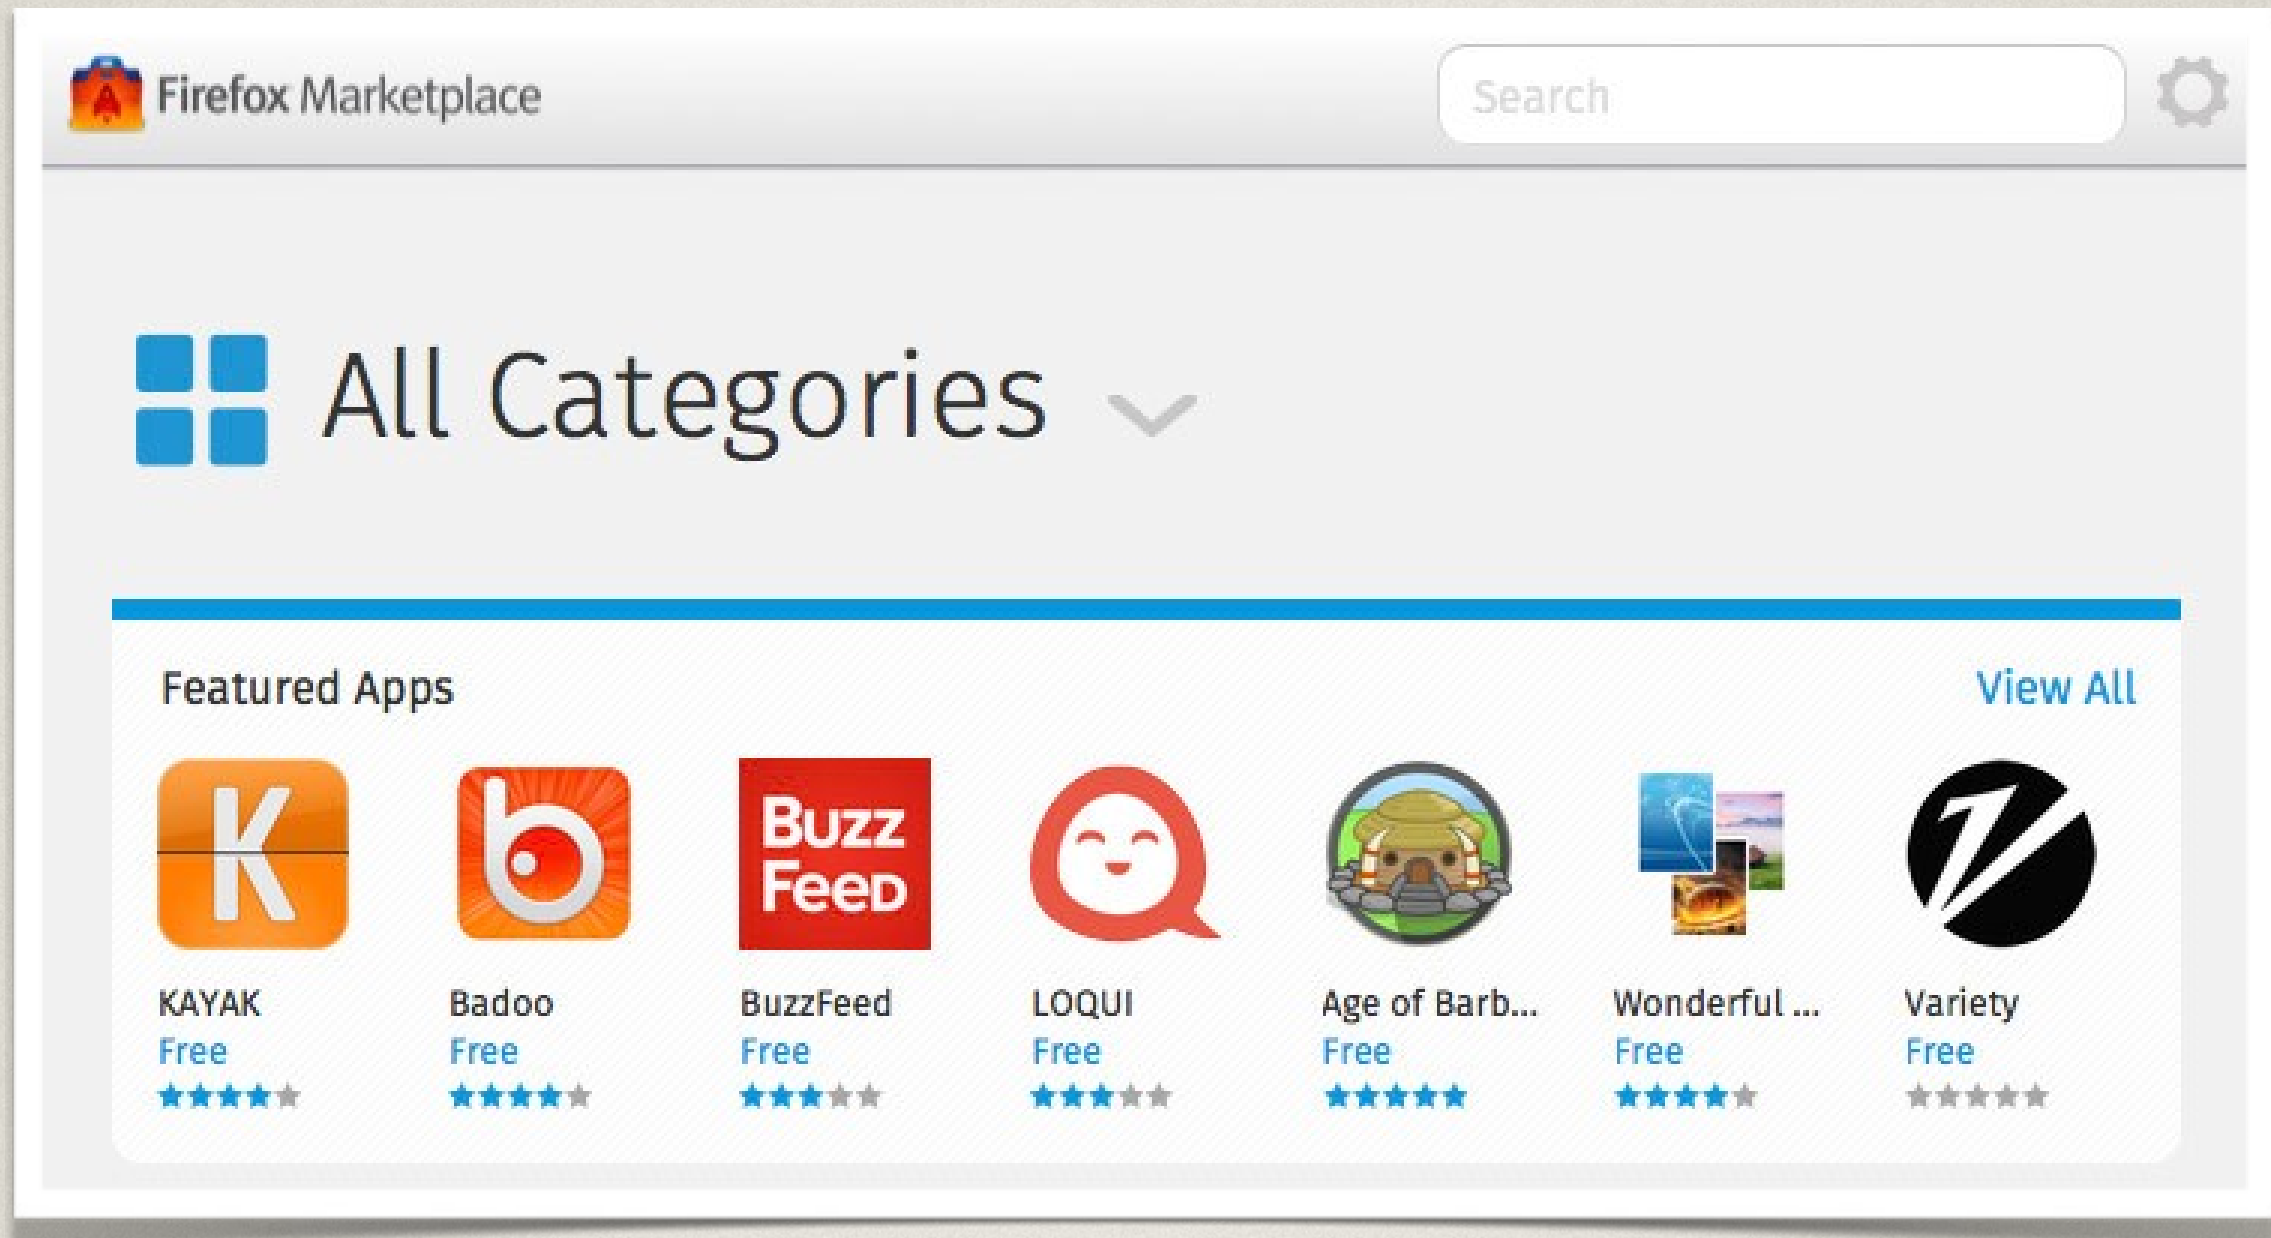

```
var getphoto = new MozActivity({  
  name: "pick",  
  data: {  
    type: ["image/png", "image/jpeg", "image/jpg"]  
  }  
});  
  
getphoto.onsuccess = function () {  
  var img = document.createElement("img");  
  if (this.result.blob.type.indexOf("image") != -1) {  
    img.src = window.URL.createObjectURL(this.result.blob);  
  }  
};  
getphoto.onerror = function () { // error  
};
```

FIREFOX OS + ANDROID!

APP DISTRIBUTION

FIREFOX OS MARKETPLACE

<https://marketplace.firefox.com/>

INSTALL FROM THE WEB...

```
var installapp = navigator.mozApps.install(manifestURL);
```

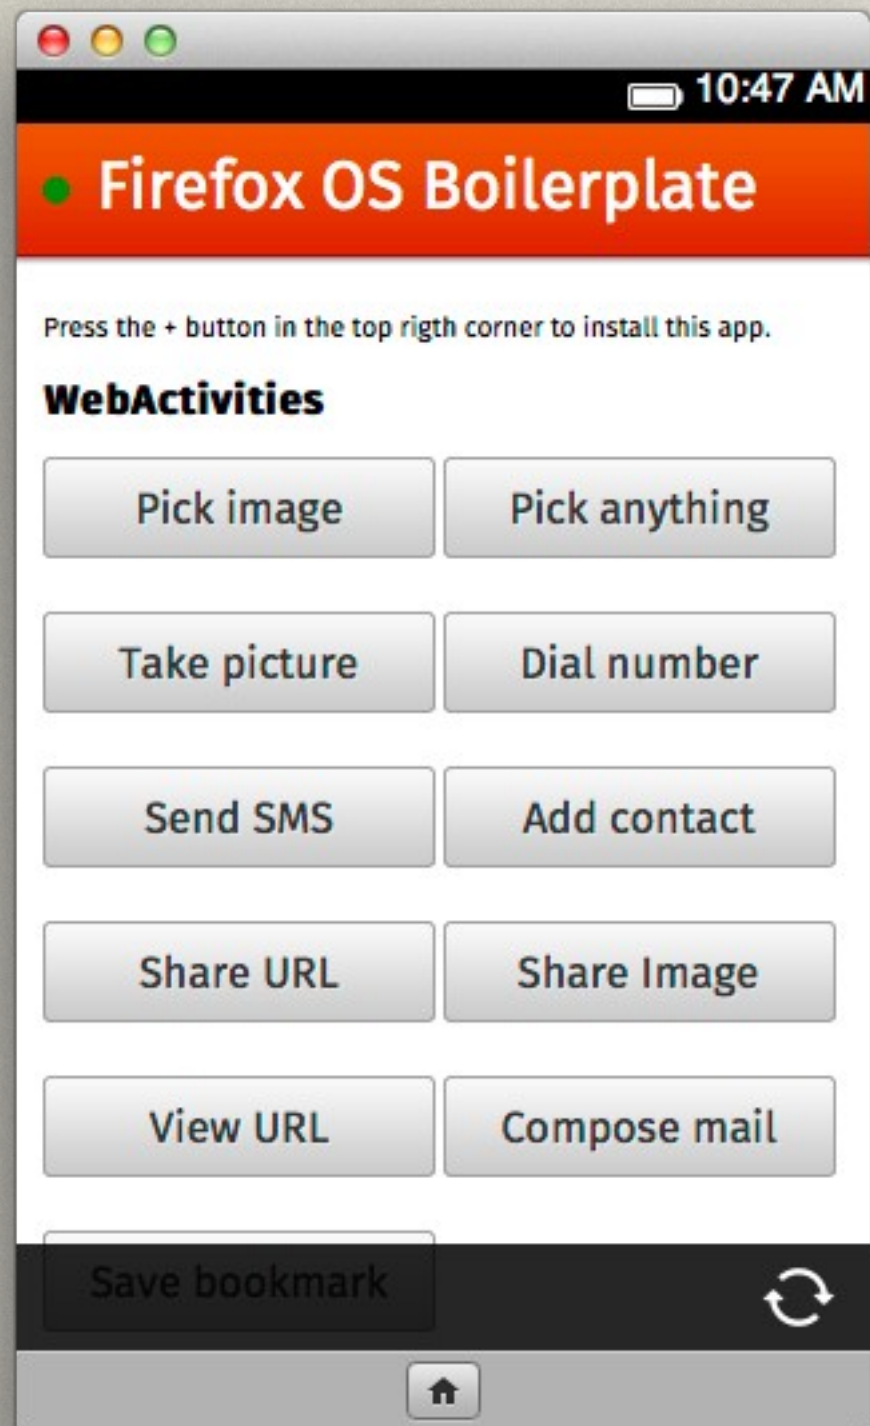

```
installapp.onsuccess = function(data) {  
    // App is installed  
};
```

```
installapp.onerror = function() {  
    // App wasn't installed, info is in  
    // installapp.error.name  
};
```

FIREFOX OS SIMULATOR

<https://addons.mozilla.org/firefox/addon/firefox-os-simulator/>

PROTOTYPING WITH JSFIDDLE

1. Write your code as a JSFiddle
2. Append /webapp.manifest to your Fiddle URL and paste this link into the Firefox OS simulator to install the app
3. Alternatively, append /fxos.html to your Fiddle URL to get an install page like a typical Firefox OS hosted application

 HISTORY

 EDIT

Firefox OS (sometimes abbreviated **FxOS**) is a new mobile operating system developed by Mozilla. It uses a Linux kernel and boots into a Gecko-based runtime engine, which lets users run applications developed entirely using [HTML](#), [JavaScript](#), and other open web application APIs.

Firefox OS is currently under heavy development; we are constantly working on ways to make it easier for you to use and hack on Gaia (the default set of apps) and create your own. However, you need knowledge about systems in order to do things like build the entire Firefox OS stack, or flash a phone with a build of Firefox OS. Linked below are guides meant for Web developers interested in running and making changes to Gaia or developing apps to run on Firefox OS devices.

THE FIREFOX OS PLATFORM

Introduction to Firefox OS

Introductory information about what Firefox OS is and how it works.

Firefox OS usage tips

Short articles to explain various useful functions you can perform with Firefox OS to help with usage and development.

Firefox OS platform guide

Documentation about the Firefox OS platform, including Gonk, Gaia, and everything in between.

Build and install Firefox OS

This includes documentation for building and installing the platform onto devices, as well as building the simulator and emulators.

GETTING HELP FROM THE COMMUNITY

If you're working with Firefox OS, or developing applications you'd like to run on Firefox OS devices, there are community resources to help you!

- Consult the Boot to Gecko project forum:
 - [as a mailing list](#) 
 - [as a newsgroup](#) 
 - [as a Google Group](#) 
 - [as a Web feed](#) 
- Ask your question on Mozilla's Boot to Gecko IRC channel: [#b2g](#) 

Don't forget about the *netiquette*... 

https://developer.mozilla.org/en/docs/Mozilla/Firefox_OS
