Introduction to Mozilla

What is Mozilla

Mozilla is a global community of volunteers, contributors and like-minded people who work towards the same goals of **Openness, Innovation** and **Opportunity** on the Web.

What do we do

- We are a non – profit organization who see success with People than with Share and Stake holders.
- We try to achieve our goal by building and promoting software like Firefox and movements like Webmaker
- We want to see the Power and potential of Internet and want to see it thrive for everyone, everywhere.

Products

Firefox

Android

OS

Marketplace

Mozilla

Persona

Webmaker

Thunderbird

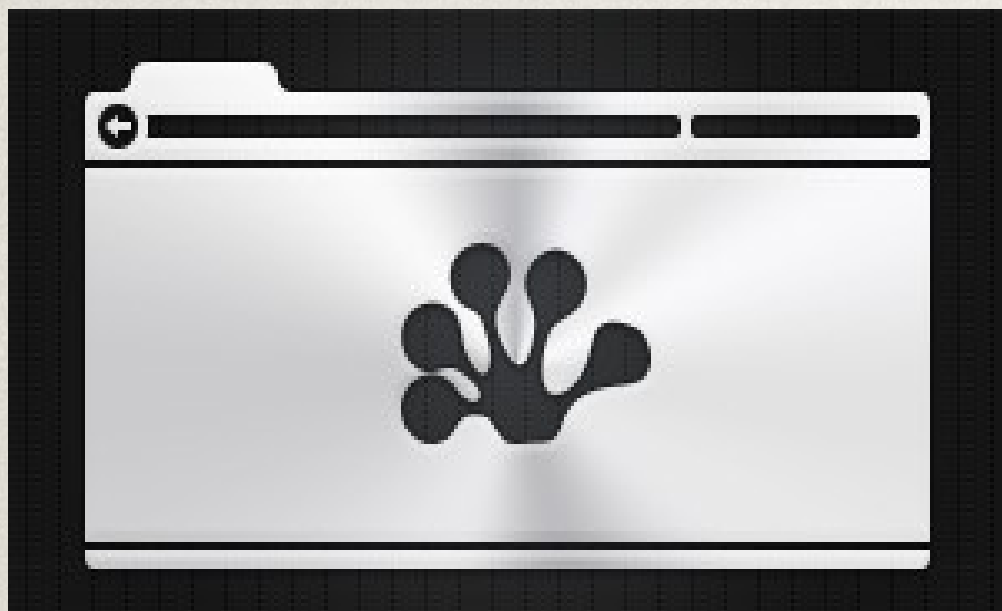

Developers

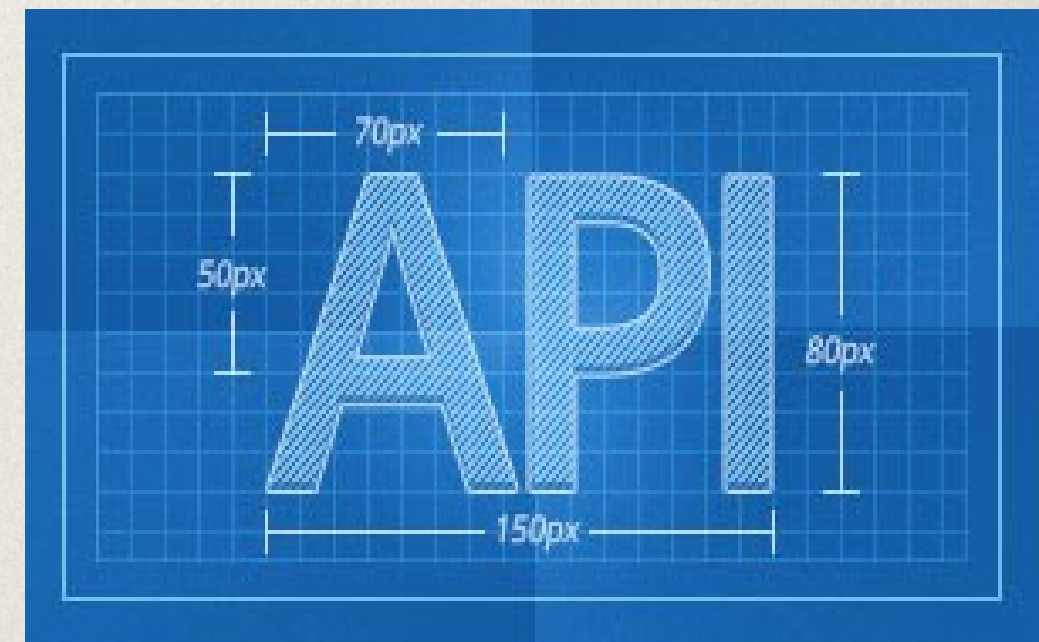

Bugzilla

Firebug

Gecko

Firefox APIs

Contribute

Building a better Internet is an ambitious goal, but we believe that it is possible when people who share our passion get involved

Coders, artists, writers, testers, surfers, students, grandparents - anyone who cares about the web can help make it even better.
